

# Rolawn GroRight® Lawn Fertiliser, Weed & Moss Killer

Rolawn GroRight® Lawn Fertiliser, Weed & Moss Killer is a triple action granular product, which will help ensure that your lawn stays weed and moss free, to give you a beautiful greener lawn. It can be used any time between late spring and early autumn, when grass and weeds are actively growing.

Results can be seen within a week, with the lawn becoming a richer, greener colour. Initially weeds will grow more vigorously before they wither and die. Maximum weed control is achieved in 2-3 weeks. The moss will blacken as it dies and can be raked out after 7-10 days. A further application may be required after 6 weeks if your lawn is badly infested with weeds or moss.

Not suitable for newly seeded lawns less than 6 months old or newly turfed lawns less than a month old, which have not fully rooted. For new lawns we recommend applying Rolawn GroRight® Lawn Establishment Fertiliser as a top feed.

Size: 2.45kg box  
Coverage: 70m<sup>2</sup> each

- NPK Fertiliser 10:2:2 + 8.0%Fe
- Promotes a greener lawn
