

Rolawn Lawn Establishment Fertiliser

Rolawn GroRight® Lawn Establishment Fertiliser is a unique, slow release pre-turfing and seeding fertiliser that feeds turf and grass seed from the roots up to ensure your new lawn gets off to the best possible start. Use all year round in any soil type.

Rolawn GroRight® Lawn Establishment Fertiliser's mini granules promote even distribution of nutrients within the soil, ensuring strong root establishment. They also protect turf from "hot" spots because each small granule contains less fertiliser than a large granule. Furthermore, these mini granules control the release of fertiliser with precision, without affecting soil pH levels.

Size: 5kg bag
Coverage: approx. 125m²

Key benefits

- Promotes rapid root growth
- Improves drought tolerance
- Feeds for up to 4 months
- Fast lawn establishment
- Improves disease resistance
- Use all year round
- Protection from root rot
- Over 70% of the nitrogen is slow release
- Excess can be used as a topfeed
