

A quality, peat free mulch, made from stabilised chopped straw with added iron minerals, that promotes healthy plant growth by enhancing soil fertility and retaining water effectively. Ideal for use as a mulch or soil improver in any bed or border; it is dark in colour and visually appealing.

Rolawn ProMulch® has been awarded the Waterwise mark for its highly efficient moisture retaining properties and significantly reduces the need to water.

Exceptional value - 1 bulk bag contains approximately 1000 litres when packed!

Bag Size: approx. 1m³

Coverage: Up to 20m² at a depth of 50mm

ProMulch helps suppress weeds and protect plants from the vagaries of the weather, as well as creating an attractive finish to beds & borders; it is a unique and sustainable alternative to other mulches:

- Improves soil
- Patented production process
- Tried and tested by the RHS Garden Harlow Carr
- Contains added iron minerals
- Peat-free
- Proven to outperform all other mulches for improving:
 - Texture
 - Air content
 - Friability
 - Moisture retention
 - Fertility
- Suppresses weed growth
- Protects plant roots from frost
- Minimises soil erosion
